The JetMister JM40 and JM70 deliver powerful dust suppression for construction, demolition, quarry and mining sites.

Delivering a mist up to 70 litres per minute, the JetMister can achieve a throw distance of 20–55 metres, depending on conditions.

A heavy-duty jetting mast provides excellent site coverage, tilting up to 60° for high-reach applications and oscillating up to 350°, with automatic 45° or 90° oscillation for effective dust control across large areas.

Jet nozzle

Dual mode high performance nozzle for jet misting or fogging.

Tilting mast

Heavy-duty mast with 0–60° tilt positioning for reaching high areas. Can also be put flat to transport easily.

Easy controls

Simple control operation to start/stop pump and move jet automatically from left to right. Emergency stop and warning signals.

Manoeuvrability

Lifting eyes and four way fork skid frame will position your JetMister into difficult locations.

Diesel Powered

Kubota water-cooled (HVO) diesel engine with electric start and dry run protection.

Or Electric power

3 Phase Electric Motor powered from a sustainable source can be your environmental option.

Easy Remote

Control JetMisters from 100m away.
